

2006 Prevost Legendary Spec Sheet / Upgrade list / Dealer comments

Legendary was founded and run by the owner of Marathon. They used craftsman from both Marathon and Country Couch paired with a European designer to deliver a modern and timeless interior and exterior. This particular coach has the least amount of obstructed glass possible in a Prevost conversion and was laid out with this in mind. Only the finest materials including real stone on the floor, Corian counters / backsplashes / shower surround, Grohe and Hansgrohe faucets, Kohler sinks, Headhunter Toilet, JennAir fridge, Fisher Pykel dishwasher, Euro Kera cooktop, GE Advantium convection oven. High end leathers, suede, fabrics, Italian furniture, curved valences, extensive use of curved cabinets and paneling throughout. Stunning curved hallway with very spacious split bath design, straight out of the yachting industry. Modern and eye catching paint that turns heads EVERYWHERE.

This coach was owned by an audiophile that owns an electronics business who spared no expense on upgrading the electronics and functionality of the control systems and electronics to the most current specifications. This Legendary is a connected coach, this means that it always has an internet connection (using your SIM card) and provides your own WiFi bubble both inside and outside the coach. This allows for remote monitoring of the video based security system inside the coach with motion alerts, temperature monitoring and alerts, smoke and carbon monoxide monitoring and alerts, wireless printing to the laser printer in the bedroom closet, Airplay music to the Salon/ Bedroom/Bay zones (you can play something different on each zone), and internet to all of your wireless devices and computer anywhere around the coach. The Crestron system is set up to make it intuitive for easy use with 3 iPads, 2 of which can be moved around the coach. The programming is exquisite with simple AV screens, lighting menus, climate control menus and shade control menus. The program (source code) is included as well as the unlock code for easy future upgrades or changes. The Saloon has a Focal 5.1 DTS surround system with a Samsung LED 4K TV, 4K BluRay player, DirecTV HD box, prewire for Apple TV or Firestick and Apple AirPlay. The Bedroom features a Focal 2.1 speaker system for music or movies, Samsung LED 4K TV, 4K BluRay player, DirecTV HD box, prewire for Apple TV or Firestick and Apple AirPlay. The bay has top of the line Focal outdoor speakers, Apple AirPlay, a wireless DirecTV box and TV that can be placed away from the coach or in the bay for viewing. Finally , there is still support through the Legendary production manager and all significant systems in the coach have support contacts, nothing is orphaned. This is a must see coach!!
