Hot and cold water faucet both sides in plumbing bay
Grey / black combined 160 Gal H3-45 w/ grey by-pass
Fresh water 160 Gal H3-45
Heated plumbing bay
Angled base water tanks for maximum drainage
Head Hunter Mach 5 water pump
Whole-Coach Water treatment system
Tank dumps driver and passenger side
Macerator pump with discharge at dump station.

Custom Interior and Exterior Design

Your choice of floor plan, fabrics, flooring, underbay design, and exterior paint scheme tailored to your lifestyle and taste by our expert in house designers.

Construction Highlights:

Ultra-light Balsa plywood, instead of laminated foam or honeycomb cabinetry, is the main component of our weigh-saving program. This ensures maximum safety and cargo carrying capability. All cabinets are CNC designed and built by our in-house craftsmen and laminators, and then installed to the tightest tolerances and stringent methodology to ensure years of trouble-free use and enjoyment. We use the newest colors and highest quality laminates, lighting, upholstery and materials to ensure the best overall quality product on the market.

About Parliament Motor Coach

We are known for our serviceability, our high quality of construction, functionality of all our systems, backups and overrides to keep you going should any component problem arise. We stand by our product and are excellent in our customer support after the sale, with night and weekend telephone support unlike any other Prevost coach converter.
