## For Life Outdoors

**An RV industry first – a truly portable, mass manufactured deck for RVers!**

For immediate release

Louisville, Kentucky - Decked Out RV Products Inc. is proud to introduce the next evolution in RV outdoor accessories with the launch of their low-profile, lightweight, portable decks designed specifically for RV owners.

**The RV Deck** offers the convenience of a deck that can be used anywhere RVers call home, an option not previously available to RVers on the move.

“In an industry that is continuously seeking enhancements for its consumers, the RV Deck and the Sidekick offer the next evolution in outdoor accessories, further reinforcing the ‘home away from home’ convenience RVing is known for,” says Lyall Wiebe, President of Decked Out RV Products. “Based on our research of the marketplace, this is the first truly portable deck that can easily go everywhere RVers travel.”

The RV Deck travels in its own transport case under the RV or in a lower storage compartment. Because the deck is low profile and the transport case is only 4 ½ inches deep, taking your deck along doesn’t mean giving up valuable storage space. Both the RV Deck and Sidekick are lightweight, quick and simple to set up – it’s so fast and easy, RVers will want to set it up when they stop for a picnic lunch!

The decks come in four sizes with four beautiful low maintenance surface options – the Shore Series offers engineered composite surfaces in Teak and in Mahogany, the Alfresco Series is Sapele, the Artisan Series is Teak. With these options, there is a style available for every taste and every RV lifestyle.

“With all the portable amenities now available to RVers, people expect their RV will have an air conditioner, an awning, a slide-out – all the conveniences that make their RV a comfortable home to travel in. Conveniences have evolved into necessities. We expect the RV Deck is the newest “must have” enhancement.”

*Come visit us at Booth 215A in the North Wing Lobby Hall, 2A. We will be happy to show off all the super cool features of the RV Deck and its trusty Sidekick.*

## **The RV Deck and Sidekick Backgrounder**

### **The RV Deck**

The RV Deck is 93 inches wide and is available in lengths of 8, 10 and 12 feet. The low-profile design (1/2 inch) ensures portability and ease of assembly without compromising the quality of a durable, hard-surface deck. The RV Deck comes in four, five or six lightweight panels with hand grips for ease of assembly, and a transport case that easily mounts under your RV or in your storage space (and at only 4 ½ inches deep, RVers don't have to sacrifice their valuable storage space to bring their deck wherever they go).

### **The Sidekick**

The Sidekick is an entry deck measuring 23" by 48" and includes an attachable shoe brush. Two panels connect together and are stored in a durable canvass carrying case when not in use. The Sidekick can be coordinated to attach to the RV Deck or can be used as a stand-alone deck at the RV entrance.

### **How are the RV Deck and Sidekick Transported?**

The RV Deck and Sidekick travel with the RV with next to no intrusion on existing storage space. The RV Deck is provided in a heavy-gauge transport grade plastic transport case with mounting hardware that allows RV Dealers to install the case directly onto the undercarriage or into a basement storage compartment of most RVs.

### **How easy is assembly?**

Assembly is simple because it had to be easy enough for us to do it! We are RVers so we designed these decks for RVers and their mobile lifestyle. Assembling the decks is as easy as hooking up to the water and electricity at your site.

### **How fast is assembly?**

The RV Deck and Sidekick deploy, and are put away, quickly and easily. Lightweight materials and intelligent design ensure the RV Deck is "ready to enjoy in less time than it takes to sing a country song".

### **Can the RV Deck be placed anywhere?**

The RV Deck design allows it to be placed on any type of ground surface you might encounter while RVing. Whether its gravel, grass, sand or cement, the RV Deck will follow the contour of the ground it is sitting on and provide you with a solid deck surface.

### **What are the RV Deck and Sidekick made of?**

The RV Deck and Sidekick are built to last. Both decks feature the highest quality marine-grade composite or wood surface materials set into an extruded anodized aluminum base, – they will complement the RVers outdoor lifestyle and withstand Mother Nature's unpredictable temperament.

### **Where are the RV Deck and Sidekick made?**

The RV Deck and Sidekick are manufactured in Manitoba, Canada.
